ABSTRACT

This study was made to investigate new dimensions for a statewide interlibrary loan service and the means for financing an interlibrary loan service for Kansas public Libraries in fiscal year 1972. Some new dimensions considered worthy of investigation were: (1) inclusion of some system library headquarters as suppliers to a state interlibrary loan network, (2) investigation of American Library Association model interlibrary loan code, (3) study of the availability of resources for interlibrary loan service, (4) experimentation with out-of-state networks, (5) experimentation with use of union list of serials for going directly to source for serial requests, (6) analysis of costs of interlibrary loan service, (7) analysis of location of supplying interlibrary loan agencies on an interlibrary loan circuit and (8) study of types of materials requested on a network and the amount of duplication among the requests. These dimensions were explored by investigating the following aspects of the Interlibrary Loan Program for FY 1971: (1) placement of members on network based on availability of materials, time and staffing factors, (2) policy and procedure for acquiring serials directly from identified sources on the network, and (3) assessment of units interlibrary loan capability. The bulk of this study is presented in tables. (NH)

PREFACE

In the Spring of 1970, the State Librarian formed the State Librarian's Interlibrary Loan Committee for the purposes of investigating new dimensions for a statewide interlibrary loan service, and means for financing an interlibrary loan service for Kansas public libraries in FY 1972. The material included in this study was compiled to meet this purpose.

Appreciation is expressed to Miss Marjorie Pomeroy, consultant; to the administrators of the fourteen libraries involved in the studies; to the Interlibrary loan staffs of these libraries, without whose gracious cooperation the studies could not have been conducted; and to Mr. Allen Gardiner of the interlibrary loan staff at the headquarters (Topeka Public Library) for his assistance to the consultant explaining the operation of the Kansas Information Circuit and in collecting the data.

Also, appreciation is expressed to Miss Marjorie Reed, Miss Lucile Wagner, and Mr. Duane Johnson for the reports included in the appendices; to the State Library Staff - Miss Claire Vincent, Mrs. Freda Dobbins, Miss Rita Gatz - for the time spent in preparing the study; and to the Central Kansas Library System in providing the funds for the consultant.

INTRODUCTION

The Kansas State Library funded the first interlibrary loan network in Kansas in 1965 under Title I of the Library Services and Construction Act. The state agency contracted with the six largest public libraries in Kansas: Johnson County, Wichita, Hutchinson, Salina, Kansas City, and Topeka, to perform interlibrary loan services for approximately 250 public libraries. This network, known as the Kansas Information Circuit (KIC), began operation on September 27, 1965.

In 1966, the State Library granted LSCA funds to seven regions which covered the entire state for the purpose of planning for public library systems; under the grant each area established a teletype interlibrary loan center which filled requests for the region and transmitted unfilled requests to the Kansas Information Circuit headquarters. All seven areas are now legally designated regional systems of cooperating libraries and perform regional interlibrary loan services.

Topeka Public Library was designated the Kansas Information Circuit headquarters. When the systems' unfilled requests (only requests for specific books were handled - no reference requests) arrived at the headquarters, as many as possible were filled by the headquarters library. The unfilled requests were compiled into one list and placed on a conference TWX call to the other five libraries. Each of the libraries searched the list for on-the-shelf availability. The order of search each day, after Topeka, was: Johnson County, Wichita, Hutchinson, Salina, and Kansas City. Johnson County was the first to search, and therefore, mailed everything on the list it had available for loan. Wichita then supplied those items which it had available for loan and which had not been supplied by Johnson County. Wichita then reported to Hutchinson those items being mailed by Johnson County and Wichita. Then Hutchinson supplied those items which it could and so on down the searching order until Kansas City. Kansas City then reported to Topeka the items being mailed by the entire Circuit. For those items not supplied by the Circuit, Topeka notified the system's interlibrary loan center so it in turn could notify the patron.

On April 1, 1967, the Kansas State Library began to serve as a resource agency. Kansas State University agreed to serve as an additional resource library on June 7, 1967, on a no-cost, reciprocal basis. and continued to do so until September 1, 1969. The University of Kansas became the third resource library for the Circuit on May 1, 1969.

From its inception until early 1970, the Circuit has been administered by the State Librarian and the Kansas Information Circuit Council, originally consisting of the administrators of the six participating public libraries on the Circuit. As additional resource libraries came onto the Circuit and as regional library systems developed, the administrators of these agencies became members of the Council. The Council acted to advise on the establishment of policies and procedures for the Kansas Information Circuit.

Since the federally funded demonstration period for the Circuit was drawing to a close, the State Librarian, on March 6, 1970, called a meeting of the administrators of the six KIC libraries, the seven regional library systems, Kansas State University and the University of Kansas. A one-year extension to end on June 30, 1971, of the federal demonstration was granted, based on the agreement of the administrators that the Circuit be expanded, and that the year be used to plan for the funding of the Circuit from sources other than federal, and that new dimensions for service and techniques for evaluation be developed for the Circuit. From this meeting, the Interlibrary Loan Committee was formed.

The purpose of the State Librarian's Interlibrary Loan Committee is to investigate new dimensions for a statewide interlibrary loan service and means for financing an interlibrary loan service for Kansas public libraries in FY 1972.

The subsequent investigations, analyses and experimentations were conducted for this purpose. It was agreed that new dimensions worthy for investigation were:

1. Inclusion of some system library headquarters as suppliers to a state interlibrary loan network.
2. Investigation of American Library Association model interlibrary loan code.
3. Study of the availability of resources for interlibrary loan service.
4. Experimentation with out-of-state networks.
5. Experimentation with use of union list of serials for going directly to source for serial requests.
6. Analysis of costs of interlibrary loan service.
7. Analysis of location of supplying interlibrary loan agencies on an interlibrary loan circuit.
8. Study of types of materials requested on a network and the amount of duplication among the requests.

In order to investigate these dimensions the Interlibrary Loan Committee endorsed the need for employing a consultant. The consultant's duties were defined as investigation and planning of the following aspects of the Interlibrary Loan Program for FY 1971:

1. FY 1971 placement of members on network based upon availability of materials, time and staffing factors.
2. Policy and procedure for acquiring serials directly from identified sources on the network.
3. Assessment of units interlibrary loan capability.

Central Kansas Library System agreed to finance the consultant. Miss Marjorie Pomeroy of the Northwest Kansas Library System, was employed to do the study.

In May, Miss Pomeroy chose two weeks (ten days) of Kansas Information Circuit daily request lists to be checked by fourteen agencies (Johnson County Public Library, Wichita Public Library, Hutchinson Public Library, Salina Public Library, Kansas City Public Library, Topeka Public Library, Kansas State Library, University of Kansas (Watson Library), Kansas State University (Farrell Library), Central Kansas Library System (Great Bend), North Central Kansas Library System (Manhattan), Southeast Kansas Library System (Iola), Southwest Kansas Library System (Dodge City), and Northwest Kansas Library System (Hoxie). The daily request lists were checked for ownership and on-the-shelf availability. The first week chosen for the study was May 18-22, 1970. This week's lists were checked May 18-22 by the agencies then on the Kansas Information Circuit (the first six agencies listed above); while the non-KIC agencies checked the lists during the following week, May 25-29, 1970. The non-KIC agencies checked the lists on corresponding days - checking Monday, May 18 on Monday, May 25; Tuesday, May 19 on Tuesday, May 26, etc. February 16-20, 1970, was the second week chosen for the study. This week's lists were checked June 8-12, 1970, by all fourteen agencies. Once more the lists were checked on the corresponding days - Monday, February 16 was checked on Monday, June 8; Tuesday, February 17, was checked on Tuesday, June 9, etc.

Miss Pomeroy designed Tables I-- VII for the tabulation of this data. She partially tabulated the data for the week of May 18-22, 1970, and Monday, February 16, 1970. During this time she chose to study the data for more information than was outlined in the duties of the consultant.

Using the ownership information from the May week and availability information from Monday, February 16, 1970, Miss Pomeroy reported her conclusions to the Interlibrary Loan Committee in late June. From this report, the order of searching was established for the start of FY 1971. The report also included the method of requesting periodicals and/or photocopies to be used for the start of FY 1971. (See Addendum I for copy of this report.)

During June, two experiments with the placement of units on the network were conducted. For these experiments the network - consisting then of the six public libraries, the Kansas State Library, and the University of Kansas Library - was expanded to include four additional agencies. (See Table VII for the summary of the experiments.) These experiments were conducted during the weeks of June 1-5, and June 15-19, 1970.

The middle of August the data arrived at the Kansas State Library after Mr. Stephens, State Librarian, offered the State Library Staff's help in tabulating the data. After the State Library Staff started the tabulation, they found mistakes in the partial tabulation of the May week and of Monday, February 16, 1970. The May lists, possibly due to the fact the KIC agencies used the work sheets they had used when doing the actual KIC lists, had inaccuracies on those items that were "owned-but-out" (OBO) and "owned-but-not-circulating" (OBNC). When tabulating the data, the State Library Staff recorded the information exactly as the agencies sent it to Miss Pomeroy, although realizing there were inaccuracies. The State Library Staff was never able to completely identify the inaccuracies. Therefore, the State Library Staff checked the tabulation for the May week and made the corrections they found necessary. Thus, all tabulation was done or verified by the State Library staff.

Several tables were slightly modified by the State Library Staff - such as changing the order of the columns or in one table adding more information to make the table more explanatory; however, the basic idea of each table was left the way Miss Pomeroy had designed it.

In September, Miss Pomeroy notified the State Library that she could not write the narrative to accompany the tables. Due to previous public commitments, the State Library Staff was not able to immediately complete the study.

The State Library Staff, in writing the explanation for each table has tried to give the purpose of the table, if the Staff was sure of Miss Pomeroy's intent. Where the Staff was uncertain, this is noted in the explanation.

Appendices I - II were designed by the State Library Staff using the data collected by Miss Pomeroy. The "Availability Study" was designed to show the actual "on-the-shelf" availability of each agency. The State Library Staff felt that this table was one the Interlibrary Loan Committee had desired.

The second table, Intrasystem Searching, shows the effect intrasystem interlibrary loan networks would have on the Kansas Information Circuit. This table was included since the Interlibrary Loan Committee had shown interest in studying the possibilities of such networks.

Appendix III consists of special reports submitted to the interlibrary loan committee by the administrators of three regional library systems. These reports are included in this study as additional data pertinent to statewide resource development.

CONCLUSIONS AND RECOMMENDATIONS

1. The three aspects of the interlibrary loan program for FY 1971 to be studied were:

    a) FY 1971 placement of members on network based upon availability of materials, time, and staffing factors.

Ownership by an agency does not always mean the agency has the material for interlibrary loan; availability is the key to a successful interlibrary loan program. For example: Topeka owned 48.65% of the items on the lists for the week of February 16-20, 1970, but had 24.83% actually available for interlibrary loan.

Arrangement of libraries on the interlibrary loan circuit should be as follows - based on the availability of materials:

1. Kansas State University
2. University of Kansas
3. Southeast Kansas Library System
4. Hutchinson Public Library
5. Topeka Public Library
6. Wichita Public Library
7. Kansas City Public Library
8. Salina Public Library
9. Johnson County Library
10. North Central Kansas Lib. System
11. Kansas State Library
12. Southwest Kansas Library System
13. Central Kansas Library System
14. Northwest Kansas Library System

However, in order to have the two universities serving in the first two positions, methods of financing their participation at this level must be found and initiated.

    b) Policy and procedure for acquiring serials directly from identified sources on the network.

The consultant recommended the requesting agency's periodical requests be sent to the Kansas Information Circuit headquarters with a notation of owners as indicated in the Kansas Union List of Serials or the Kansas Systems Serial Service Union List. The headquarters library then will select the owning agency to fill the request and will forward the request to that owning agency.

    c) Assessment of units interlibrary loan capability.

An agency's interlibrary loan capability can be determined by checking availability as they coincide.

2. Libraries with the lower percentages of availability (capability of supplying materials) should be analyzed in relationship to the cost of their being a supplier prior to FY 1972. Such analysis should guide the Interlibrary Loan Committee in deciding the worthiness in continuing these agencies on the Circuit.

3. Intrasystem interlibrary loan searching is worthy of investigation. The Kansas Information Circuit would receive 35% less requests if intrasystem interlibrary loan networks were operating in all systems. Therefore, it is recommended that each system which is not now utilizing intrasystem interlibrary loan searching, conduct studies of ownership, availability, personnel, etc., among the major resource libraries within the system. Such studies would indicate those agencies which could be included in an intrasystem interlibrary loan network.

4. Of the located items on the lists for the weeks of February 16-20, 1970, and May 18-22, 1970, 29.28% had single or two owners. The other 70.72% had three or more owners. The studies conducted by three of the systems show that the items requested from within a system are seldom duplications. Therefore, any financial assistance to the supplying libraries for purchase of materials - whether the funds are federal, state, or regional - should be carefully coordinated to prevent unnecessary duplication of materials.

5. The most requested subjects that are located on the Circuit are the materials in the 900's and the 300's. The main areas in the 900's are General Biography, General History of North America, General Geography, and General History of Modern Europe. In the 300's the main areas are Sociology, Education, Political Science, and Economics. Any statewide resource purchasing grant should be responsive to these subject areas. The Interlibrary Loan Committee should check the strengths of these subject areas in the various libraries and then build on these strengths with the resource funds.

Table I

OWNERSHIP BY ITEM, AGENCY, AND TYPE OF MATERIALS

In order to gather the data for this table, each agency was asked to make a catalog search of ten KIC lists, those for the week February 16-20, and May 18-22, 1970. Each agency indicated ownership of items by marking the call number beside each item they own on each KIC list. In addition, each agency was asked to make a shelf search of those items they own and to indicate those which are owned-but-out (OBO) and/or owned-but-not-circulating (OBNC).

The results of these searches for each agency are shown on the following tables, there being one table for each of the ten KIC lists. The tables are arranged by the type of material (non-fiction, fiction, and photocopies), and the corresponding item numbers from the KIC lists. Those items which are juvenile or young adult are so indicated with a "J" or a "Y".

Items owned by each agency are indicated by an X under the appropriate item number. If the item was OBO, a plus (+) is added by the X; if the item was OBNC, an asterisk (*) is added by the X. At the end of each table, the total items owned, OBO, and OBNC are given for each agency.

At the bottom of the tables, the total owners for each item are given. Those items which were either OBO or OBNC at all owning agencies, and therefore, were not supplied, are so indicated at the bottom of each table. (An asterisk (*) at the bottom indicates that all owning agencies recorded these items as OBNC, and, therefore, the item could never be supplied; a plus (+) at the bottom indicates that at least one of the owning agencies recorded the item OBO, and therefore, the item could have been supplied at a later date).

The data resulting from this study show:

1. The total number of items on each KIC list which are owned, OBO, and OBNC at each agency;
2. The total number of owners of the located items on each KIC list;
3. The items on each KIC list which could not be supplied because they were either OBO or OBNC at all owning agencies.

Table IIa

SUMMARY OF ITEMS OWNED BY NUMBER OF OWNERS

The data on these tables show how many items on each day had a specified number of owners, such as single owners. two owners, etc. The total number of items for each week is given for each number of owners, which, when divided by the total number of located items for each week, gives the percentages.

Table IIb

NUMBER OF OWNERS PER ITEM; SUMMARY BY DAY OF WEEK AND TYPE OF AGENCY

These tables analyze the number of owners per item by the day of the week and the type of agency. Each table covers a specific number of owners, such as one owner, two owners, etc. The table also shows how many items each agency owns in nonfiction. fiction and photocopies for each day and the totals for the week.

At the bottom of the table, there is a division by type of agency. The first category, KIC libraries, refers to the first six libraries listed (which were the ones on the actual Circuit at the time the data was collected).

Table IIc

NUMBER OF OWNERS PER ITEM

The data on these tables include the item number from the corresponding Kansas Information Circuit list, the number of owners of the item, which agencies own the item, and the classification of the item (fiction, nonfiction, or photocopy). There is a separate table for each of the ten lists.

The State Library staff believes Miss Pomeroy designed these tables to identify the number of single owner items owned by the various types of agencies and to identify the percentage of items that had single owners, two owners, etc.

Table III

ANALYSIS BY AGENCY OF LOCATED ITEMS OWNED AND NOT OWNED

These tables consist of the following information:

> The number of nonfiction, fiction, and photopcopy items owned on each KIC list by each agency;
>
> The combined total of the nonfiction, fiction, and photocopy items owned on each KIC list by each agency;
>
> The percentage of the total located items owned by each agency (computed by dividing the total items owned by each agency by the total items located by all agencies);
>
> The number of nonfiction, fiction, and photocopy located items not owned by each agency;
>
> The combined total of the nonfiction, fiction, and photocopy located items not owned by each agency;
>
> The percentage of the total located items not owned by each agency (computed by dividing the located items not owned by each agency by the total located items not owned by all agencies).

These tables summarize the number of items owned and not owned by each agency on each KIC list and, in the opinion of the State Library staff, show ownership, not availability. All computations are based on the total items located (or owned) by all agencies, not on the total items on each KIC list.

Monday, February 16. 1970

ANALYSIS AND SUMMARY BY AGENCY OF ITEMS OWNED, NOT OWNED, OWNED BUT OUT, AND OWNED BUT NOT CIRCULATING

The data on this table includes the number of items owned, not-owned (NO), owned-but-out (OBO), and owned-but-not-circulating (OBNC) for each of the fourteen agencies. The percentages of items owned and NO were computed by dividing these amounts by the total items owned by each agency. The OBO and OBNC information for the first six agencies for the week in May is inaccurate, according to Miss Pomeroy. The State Library staff was unable to determine the exact nature of the inaccuracies, and, therefore, used the figures as submitted by each of the six agencies. The data has been compiled for each day, with a summary for each week.

The State Library staff is of the opinion that this information reflects ownership, not availability.

Table V

SUMMARY BY ITEMS OWNED, NOT OWNED, AND TYPE OF MATERIAL

This table is a summary for each of the ten KIC lists. February 16-20, 1970, and May 18-22, 1970. The data for each list include the total number of items on the list; the total number of items owned by the fourteen agencies; the percentages of items owned, computed by dividing the number of items owned by the number of items on the list; the total number of items not owned by any of the fourteen agencies; the percentages of items not owned, computed by dividing the number of items not owned by the number of items on the list. The items that were owned were then analyzed according to fiction, nonfiction, and photocopies. The percentages of these were found by dividing the number in each classification by the number of items owned.

The data reflects that although Tuesdays appear to be the days when KIC use is the heaviest, Fridays appear to be the days when the highest percentages of ownership occur.

The State Library staff is not able to ascertain the purpose of this table in relationship to a study of availability.

CLASSIFICATION OF NONFICTION MATERIALS OWNED

The data for this table was obtained from the classification numbers of nonfiction items owned by each agency on the individual KIC lists. If different classification numbers were given for the same item by several owning agencies, the number used the most frequently was selected for the purposes of this table. No attempt has been made to obtain classification numbers for those items which the State Library staff determined were Library of Congress order numbers.

The selected classification numbers are listed in the first column. The corresponding interpretation for each classification number according to Dewey Decimal Classification, 17th Edition, is recorded in the second column. The number of items from the May lists and the February lists which fall into each classification are shown in the third and fourth columns respectively. The total items from both weeks' lists in each classification are combined and listed in the fifth column. The sixth column contains the grand total of items which fall into each major Dewey grouping or class. The percentage of items in each Dewey class (seventh column) was calculated by dividing the total items in each Dewey class by the total number of nonfiction items located from both lists.

The results of this study indicate that the most requested nonfiction items are materials in the 900's and the 300's, and the least requested materials are in the 400's.

The State Library staff is of the opinion that this data is not useful in its present form. A more meaningful analysis could have been made which indicated the depth of nonfiction material owned by each of the agencies, had the data been compiled by agency. Such data could be useful regarding statewide resource development, so that special resource collections could be built on existing strengths. It is also suggested that an analysis of not owned items should have been made, in order to learn the areas where gaps occur most often. Such information could also be useful in resource development.

The State Library staff, therefore, feels that this data is not pertinent to an availability study, and perhaps has missed Miss Pomeroy's intentions for including it in the study.

Also included is a partial summary table, designed by the State Library staff, on which the Dewey classes are arranged in descending order, with the most frequently requested materials listed first. The second column indicates the Dewey divisions within each Dewey class, most often requested. Those Dewey divisions requested the least are not included; therefore, this is a partial summary. The percentages of Items in Each Dewey Division were computed by dividing the Total Items in Each Dewey Division by the Total Items in Each Dewey Class.

The Interlibrary Loan Committee should check in the various libraries for strengths in the subject areas most frequently requested, and build on these strengths for statewide resource development.

CIRCUIT EXPANSION STUDY

The following tables reflect the results of two Trial Runs, one during the week June 1-5, 1970, and the other during the week June 15-19, 1970, of an expanded KIC network. For the purposes of this experiment, the Central Kansas Library System, the North Central Kansas Library System, the Southeast Kansas Library System, and Kansas State University were added to the agencies searching the daily KIC lists in addition to the six public libraries, the State Library and the University of Kansas, the regular participants on the network.

During the course of the experiments each agency reported to Topeka Public Library the number of items it was mailing, and the number of items owned-but-out (OBO), and/or owned-but-not-circulating (OBNC) in its collection. In addition, each agency also included the time of day at which it concluded its search of each list in its report to Topeka Public Library.

For the first week's experiment, the six public libraries remained in their normal searching order followed by the three regional library systems, then the State Library, and finally the two universities. During the second week's experiment, the three regional library systems were first, followed by five of the public libraries, the State Library, the two universities, and Topeka Public Library last.

The data on each table is arranged by agency and by day of week followed by the totals for the week. The number of items mailed, OBO, and OBNC with the respective percentages for each agency are also listed. The percentages for each agency were computed by dividing the total items mailed, OBO, and OBNC by the total items on the KIC lists for each week. The summary tables are arranged by day of week rather than by agency. The number of items mailed, OBO, OBNC, and not-owned (NO) are given with the respective percentages for each day as well as the totals for each week.

Also included is one table for each week showing the time of relay for each agency in searching order. On Trial Run #1, the times listed for Topeka are the times when the conference call was broadcast to the other agencies; the times listed for KSU are the times when they reported back to Topeka. On Trial Run #2, the times listed for SEKLS are the times when SEKLS completed searching the lists (SEKLS received the daily conference calls from Topeka at approximately 9:30 a.m.); the times listed for Topeka are the times when Topeka completed searching the lists. The numbers in parentheses ( ) represent the second day after a conference call was broadcast, and in some instances, three days were necessary before all agencies had searched the lists. For example, on Monday during Trial Run #1, it took from 10:25 a.m. until 4:50 p.m. on Monday for the first ten agencies to search that list; KU and KSU, therefore, did not complete their searches until Tuesday. It is pointed out that no list could be searched by all agencies in one day; every list took at least two days. During Trial Run #2, when the Southeast Kansas Library System searched first, it is noted that it took SEKLS anywhere from two to five hours to complete searching the lists. This is due to the fact that this system utilizes intrasystem searching, which does slow down the quickness of the circuit. However, it should also be pointed out that the SEKLS mailed the highest percentages of items as a result of intrasystem searching, and that the extra time appeared not to have unusual effect on the speed of the network.

Miss Pomeroy undertook these experiments at the request of the Interlibrary Loan Committee to investigate the placement of units on the network. It is assumed by the State Library staff that the present searching order of the network is based somewhat on these two circuit expansion studies.

June 22, 1970

Mr. James C. Marvin, Librarian
Topeka Public Library
1515 West Tenth Street
Topeka, Kansas 66604

Dear Jim:

Enclosed are the results I've come up with in my capacity as consultant. With this presentation, I consider my formal contractual commitment to have been met.

My study results are unfinished because of late returns from participants and insufficient time for recording and analyzing the data. (Some availability-study lists are not yet in, and as for time, I've spent every available hour possible in trying to complete the job.)

However, there is enough by which to get us started on July 1, and the plan allows for change if the completed data should change the basis for the preliminary conclusions.

This has been my first venture into original research, and except for time pressures, I have really enjoyed the project. For my own satisfaction, I want to proceed (at my own pace) with recording the remainder of the data, and I hope to report later to all participants my final analysis based on the study data.

Sincerely yours,

Marjorie J. Pomeroy

(Miss) Marjorie J. Pomeroy

TWX Station 910-744-6700

June 22, 1970

TO : KIC network suppliers, as of July 1
FROM: Marjorie J. Pomeroy, KIC consultant

Beginning July 1, 1970

Based on preliminary (not complete) findings, seven library agencies should receive the daily conference call. These are, in order of relay:

1) Hutchinson
2) Wichita
3) SEK/Iola
4) Kansas City
5) Johnson County
6) Salina
7) NCK/Manhattan

NCK relays to headquarters at Topeka.

Topeka compiles residue list and transmits via conference call to the following, in order of relay. (Thus, a Wed. list-residue for example, may be transmitted Thurs. morning.)

1) CK/Great Bend
2) State Library
3) KU
4) KSU

KSU relays to Topeka, which is last searcher.

KIC Members: The Interlibrary "Loan ar-Rangers"
Topeka + Johnson County + Wichita + Hutchinson + Salina + Kansas City

Addendum I

KIC Network

June 22, 1970

Basic premises

The headquarters function of the interlibrary loan network (KIC) need not be assumed by a resource center. If these two are joined, this does not require that first position in circuiting be held by the resource center.

There appears to be considerable difference in output between being first and last on the network.

Conclusions from premises

Topeka, which serves both as KIC headquarters and as a resource center, need not be in first position in circuiting on the network.

Topeka, in actual circuiting, has mailed considerably more items proportionately when first on the circuit than when last.

To reduce its workload as resource center beginning July 1 when its headquarters duties are heavier because of additional duties and the expanded network, Topeka will be last in circuiting position beginning July 1.

Addendum I

Consultant's Study
Summary

1. Ownership from 5 days' lists (Availability study: week no. 1, May 18-22, 1970) : ranked 1 to 6 :

(1) Topeka : 3 - 1st ; 1 - 2nd ; 1 - 6th
(2) Hutchinson: 2 - 1st ; 1 - 2nd ; 2 - 3rd (1 tie)
(3) Wichita : 3 - 2nd ; 2 - 4th
(4) KU : 2 - 3rd ; 1 - 4th ; 1 - 5th (tie) ; 1 - 6th (tie)
(5) SEK : 1 - 3rd ; 3 - 5th (1tie) ; 1 - 6th
(6) NCK : 1 - 3rd
(7) KSU : 1 - 4th
(8) Kansas City : 1 - 4th ; 1 - 5th ; 1 - 6th
(9) Salina : 1 - 5th (tie) ; 1 - 6th
Johnson Co. : 1 - 5th (tie) ; 1 - 6th

2. Indications of actual mailing capability, if first on circuit, after ownership - availability is reduced by OBO - OBNC (using Mon., Feb. 16, 1970 list of 158 items less 25 not owned = 133 located) : ranked according to highest number of items that might be mailed:

(1) KU
(2) KSU
(3) Hutchinson
(4) Topeka
(5) Kansas City
(6) Wichita and SEK
(7) Johnson County
(8) Salina
(9) NCK/Manhattan

continued

Consultant's Study (continued)

3. Eliminate Topeka (to be last) and KU - KSU (to receive residue lists) from #1 and #2 above, as follows:

Ownership, 5 days	Ownership reduced by OBO-OBNC: 1 day
(1) Hutchinson	(1) Hutchinson
(2) Wichita	(2) Kansas City
(3) SEK	(3) Wichita and SEK
(4) NCK/Manhattan	(4) Johnson County
(5) Kansas City	(5) Salina
(6) Salina and Johnson Co.	(6) NCK/Manhattan

4. Actual circuiting, trial runs June 1 - 5 and June 15 - 19, 1970:

   a. Searching covers 2 days
   b. The second day of 2 - day searching, with 12 on circuit, has begun most often at 9th position.
   c. The relays nearest 5:00 on the first day's runs have most often occurred at 8th position.
   d. SEK as a decentralized supplier needs two to three hours usually in handling list; however, this has made no substantial difference in progress on the network of any given list.
   e. The 6th position relay ranged from 3:00 to 4:30 on trial run #1 and from 2:45 to 6:00 on trial run #2; most often before 4:00 on #1, and most often before 4:15 on #2.
   f. The 7th position relay was most often before 4:15 on trial run #1; most often before 4:45 on trial run #2.

Addendum I

TO: K.I.C. NETWORK SUPPLIERS, AS OF JULY 1.
FROM: MARJORIE J. POMEROY, KIC CONSULTANT.

INSTRUCTIONAL NOTES

Original conference-call recipients

List #1127 on July 1 will be transmitted to the seven agencies listed on p. 1.

If you have not received your list by 10:30 a.m., please so notify Topeka. (This applies to any day's list. Occasionally, conference-call difficulty has resulted in no list reaching an agency.)

Residue-list recipients

List #1127 residue will be transmitted on July 2 to the four agencies (and Topeka) listed on p. 1.

If you have not received your list by 11:30 a.m., please so notify Topeka. (This applies to subsequent lists as well.)

ALL AGENCIES

Please keep your line open in the a.m. to receive lists.

Follow usual KIC procedures, relaying cumulative mailings to successive agency, and reporting also to that one the agency-by-agency OBO and OBNC items.

Periodical-suppliers: Report to KIC hdq. by the end of the day if you cannot fill any periodical request transmitted to you.

K. U. & K.S.U.

Please mail direct to requesting agency.

Addendum I

TO: SYSTEM CENTERS SENDING KIC REQUESTS: KIC NETWORK.
FROM: MARJORIE J. POMEROY, KIC CONSULTANT.

PERIODICALS: USE OF UNION TOOLS

New requesting procedures: Requests to KIC hdq.:

Effective July 1, 1970

Beginning with your requests of June 30 that will be on the July 1st KIC list (#1127) please check union lists before sending:

1. Check your systems union list for owners (locations) at:

Topeka	Kansas City
Johnson Co.	SEK/Iola
Wichita	NCK/Manhattan
Hutchinson	CK/Great Bend
Salina	State Library

2. Check your Kansas Union List of Serials (universities) for locations at:

   Kansas University (KU)
   Kansas State University (KSU)

Place your periodical requests at the bottom of your usual request lists to KIC headquarters.

With each periodical request sent to KIC hdq., please add the owners: as, Owned by....

If owners are multiple, list no more than 3 or 4, but try not to choose always the same owners.

Memorandum on Interlibrary Loan Study

TO: Administrators and Interlibrary loan personnel
AGENCIES: KIC libraries, System centers, State Library, KU and KSU
FROM: Marjorie J. Pomeroy, KIC Consultant

SUBJECT: "Availability" study

One of my assigned responsibilities is to make a study of the materials available for interlibrary loan. This study is in preparation for new planning for the KIC circuit which includes additional centers as suppliers beginning July 1, 1970.

May we request your cooperation in this project whether you will be a KIC network supplier or not. All agencies addressed herein are represented on the State Librarian's Interlibrary Loan Committee, out of whose group actions this present activity has evolved.

You will be receiving separately by mail two sets of TWX copies of KIC lists, each set representing one week of such lists, or ten lists in all. The first week will be one during a less heavy-duty month. For that we have chosen this week of May 18-22, 1970. The second will represent a week during a heavy-duty month. We have selected February 16-20, 1970. The list for Monday's searching accompanies this letter. The others will be forthcoming.

The study will encompass two facets: ownership-availability and on-the-shelf availability.

Instructions will accompany the lists, but here is some of the needed information:

Ownership: Mark call number or NO (for not owned) as appropriate at the left side, to the left of the number for each item.

On-the-Shelf: In the right margin show OBO (for owned-but-out) or OBNC (for owned-but-not-circulating) where appropriate. Leave blank any for which OBO and OBNC do not apply.

(Care will need to be observed to keep information about ownership in the left margin and about on-the-shelf and circulating ability in the right margin.)

We hope that you can plan for extra staff time next week when the first week's lists for this study will need to be searched. Extra time also will be needed for checking when the second week's lists come to you later.

Also, can those of you not in KIC libraries plan to shelf-search Monday's list dated May 18 on Monday, May 25, Tuesday's list dated May 19 on Tuesday, May 26, etc.? We hope to assess what the availability situation might have been had you been on the supplying circuit on the day a list came out even though the dates are different.

For KIC libraries the shelf-search information on OBO's and OBNC's would be just as they were respectively transmitted to the next library on the circuit on the actual day, and can be copied from work sheets. That is, each KIC library, for example, will transfer from work sheets for Monday, May 18, the OBO and OBNC information of that day to the availability-study sheet for May 18. All agencies, however, will fill in the ownership information at the left side of each KIC list.

The lists will be complete, rather than as usually submitted to other KIC libraries after Topeka, the headquarters, has already supplied what it has available.

The completed lists should be mailed to:

Miss Marjorie J. Pomeroy
KIC Consultant
NWK Library System
Box 606
Hoxie, Kansas 67740

INSTRUCTIONS

Availability Study - KIC Lists

I. Time for Checking

1. Please check a list marked Monday on the Monday designated. (For the study's purposes every agency needs to check the list on the same day.)
2. Please check a Tuesday list on the designated Tuesday.
3. Ditto - Wednesday, Thursday, Friday respectively.

II. Left-Hand Margin (ownership information)

1. Mark the call number (if item is owned) at the left of the item number.
2. Mark NO (if item is not owned) at the left of the item number.

III. Right-Hand Margin (On-the-shelf and circulating information)

1. Mark OBO (if item is owned but out on the day the list is checked) in the margin at the right of the item's top line of print.
2. Mark OBNC (if item is owned but not circulating) in the margin at the right of the item's top line of print.
3. Leave blank in right margin if item is neither OBO or OBNC.

IV. Lists of May 18-22, 1970

Attention: KIC libraries

OBO and OBNC items: Record the results as for the day you actually did the search, transferring that information from your work sheets:

Show on May 18 list (KIC list #1095) the OBO's and OBNC's as actually reported to next circuit library on May 18.

Show on May 19 list as actually reported on May 19, etc. (Note: If you failed to save work sheets, follow instructions for other agencies.)

Attention: non-KIC agencies

OBO and OBNC items: Search as follows:

Monday's list dated May 18 on Mon., May 25
Tuesday's " " May 19 on Tues., May 26
Wednesday's " " May 20 on Wed., May 27
Thursday's " " May 21 on Thurs., May 28
Friday's " " May 22 on Fri., May 29

INSTRUCTIONS
Availability Study - KIC Lists (continued)

V. Lists of February 16-20, 1970

Attention: All agencies
Search as follows:
Monday's list dated Feb. 16 on Mon., June 8
Tuesday's " " Feb. 17 on Tues., June 9
Wednesday's " " Feb. 18 on Wed., June 10
Thursday's " " Feb. 19 on Thurs., June 11
Friday's " " Feb. 20 on Fri., June 12

VI. Mail each list daily, as completed, to:

Miss Marjorie J. Pomeroy, KIC Consultant
NWK Library System
Box 606
Hoxie, Kansas 67740

June 4, 1970

TO: Interlibrary loan personnel, and Administrators
AGENCIES: KIC libraries, System centers, State Library,
KU and KSU

FROM: Marjorie J. Pomeroy, KIC Consultant

SUBJECT: Availability study - Reminders and notes

REMINDERS

The second week's availability study is June 8-12, 1970.

Instructions as before, will accompany each day's list.

These lists are extra-long because they are to represent a heavy-duty week of KIC operation. That week comprises the lists actually received at KIC headquarters during Feb. 16-20, 1970.

NOTES

Instructions: Please check your own procedures with the instructions listed. Here are some of the problem areas that cause difficulty in statistical compilation:

1. Mark every item at left side for ownership.

   Please mark even those that your agency originally submitted to KIC. (It took me a while to catch on to the fact that some of you left whole groups blank because they were ones you submitted to KIC. I was counting only. The necessity for analyzing those items left blank is very time-consuming in statistical tabulation.)

2. Mark have if you own an unclassified or unprocessed book.

   a. Please make the judgment at your end as to ownership vs. NO. Notes like temp. leave me to be the judge of ownership. If you have an item, no matter what its status, the have note settles it for me in trying to make an accurate tabulation.

   b. If you own an uncataloged or unprocessed book, your notes uncat. and unprocessed are o.k. as additional memos.
   Report these as OBNC in right margin if you would not circulate them in that status.

   c. Items on order should be reported NO if not yet available. (An additional parenthetic "on order" note under the NO will indicate why NO.)

Availability study - Reminders and Notes (continued)

Notes (continued)

3. Keep right-hand marginal notes in vertical column in margin. Many have tended to follow the lines of print with OBO and OBNC listings, which in effect zigzags these. Some of these are virtually indistinguishable without very close scrutiny. This has made reading and tallying quite difficult and very time-consuming.

4. Periodical photocopies.

   a. You all very ably substituted for my omission and oversight in instructions. Your "Yes", "Available", "Have" filled the bill nicely.

   b. Yes is the best way to standardize such replies on those upcoming lists, if you own the periodical.

   c. Indicate ownership even if you do not do tip-ins. This last circumstance, in effect, makes this an OBNC item for statistical purposes.

5. NO should be in left - not right - margin.

6. Please try to mail finished lists daily so as not to delay statistical compilation.

7. Count as owned any item whether or not date of issue as given is different, unless request specifies "Must have this edition". (Add parenthetic note to show variation in dates.)

8. Please TWX or call immediately (either hq. at Topeka or direct to me at Hoxie) if you do not get your list on the proper day (Mon. list for Mon. searching, Tues. list for Tues. searching, etc.).

Note: A big THANK YOU for all the cooperation so far.

Memorandum on Interlibrary Loan Study

TO: Administrators and Interlibrary loan personnel

AGENCIES: KIC libraries; CKLS, NCKLS, SEKLS; State Library;
KU and KSU

FROM: Marjorie J. Pomeroy, KIC Consultant

SUBJECT: Trial runs, expanded network study

Another of my responsibilities in this assignment is to experiment with placement of units on the network. This, like the availability study, is an activity resulting from group actions of the State Librarian's Interlibrary Loan Committee. All agencies addressed herein and to whom copies of this message are being sent are represented on this committee.

The weeks for pilot project arrangements on the network are June 1-5, 1970, and June 15-19, 1970.

KIC libraries, with the exception of Topeka, will be in their usual relationship to one another during either week. Topeka will be first searcher during the June 1-5 circuiting and last searcher of the entire group in the June 15-19 circuiting.

During the first expanded-network week, the State Library, KU, and KSU will be at the bottom of the circuit in that order, and during June 15-19, the second such week, they will be followed in that relative position by Topeka.

During the first week of the pilot project the system centers being added to the network will follow the KIC libraries. These centers will precede the KIC libraries during the trial runs of June 15-19.

For both June 1-5 and June 15-19 projects each agency will report back immediately to headquarters at Topeka its own record of which items it is mailing and which it is reporting owned-but-out (OBO) or owned-but-not-circulating (OBNC). This should be done immediately after relaying such information to the next agency succeeding it on the circuit.

KIC Members: The Interlibrary "Loan ar-Rangers"
peka + Johnson County + Wichita + Hutchinson + Salina + Kansas City

ILL Trial runs

May 27, 1970

As explained via TWX, various factors including time limitations have made it impossible to plan either major type of experimentation to run consecutively. The calendar therefore, is as follows:

May 25-29	Availability study
June 1-5	Expanded network pilot project
June 8-12	Availability study
June 15-19	Expanded network pilot project

Itemized instructions for June 1-5 will reach you before Monday. Those for June 15-19 will come just prior to that week as well.

We shall appreciate very much your help in providing this basic study data.

cc: NEKLS (Lawrence)
SWKLS (Dodge City)
NWKLS (Hoxie)

Addendum III

INSTRUCTIONS - EXPANDED NETWORK

Pilot Project: Week of June 1-5, 1970

I Conference-call list

A. List will be complete

1. TPL will transmit conference-call list before doing own searching
   (Customarily, TPL has submitted partial list after own searching)
2. JCPL thus becomes second searcher (instead of first, as usual)

B. All participating agencies will receive conference-call list

1. KIC libraries
2. Three system centers
3. State Library
4. KU and KSU

C. Agencies may elect, as suits their own staffing schedules, to do list searching

either

1. Entire, preparatory to receiving report from preceding circuit libraries

or

2. Partial, as dictated by eliminations indicated by reports from preceding circuit libraries

II First and second searchers

A. TPL is first searcher

1. TPL relays to JCPL its report of items searched: items being mailed, owned-but-out (OBO), owned-but-not-circulating (OBNC)
2. JCPL waits for TPL report before relaying to Wichita

B. JCPL is second searcher

1. TPL report is received
2. JCPL searches (or reports on search) after receiving TPL report
3. JCPL relays cumulative report to Wichita
4. JCPL immediately relays back to hq. at Topeka the numbers of the items it is
   a. mailing from its own collection
   b. reporting OBO from own collection
   c. reporting OBNC from own collection

(Note: See IV-C)

INSTRUCTIONS - EXPANDED NETWORK (continued)
June 1-5, 1970

III Progression on circuit

- A. KIC libraries
  1. Order of relay

TPL	Hutchinson (see #3)
JCPL	Salina
Wichita	Kansas City

  2. Kansas City relays to CKLS (Great Bend)
  3. Exception: Skip Hutchinson on June 1 (KIC office closed there that day)
  4. June 1 only: Wichita relays to Salina
- B. System centers
  1. Order of relay
     CKLS/Great Bend
     NCKLS/Manhattan
     SEKLS/Iola
  2. CKLS receives from Kansas City
  3. SEKLS relays to State Library
- C. Special and universities
  1. Order of relay
     State Library
     KU
     KSU
  2. State Library receives from SEKLS
  3. KSU relays to hq. at TPL

IV Procedures

- A. Search the list (according to either #1 or #2)
  1. In toto, beginning of day
  2. In part, when message received from previous agency
- B. Relay to next library agency on circuit
  1. Item numbers of items being mailed
     (Reported here by cumulative listing of numbers, rather than per agency. Add own to others previously listed, keeping in numerical sequence.)
  2. Item numbers of items being reported owned-but-out (OBO)
     (Reported here per agency, relaying own and also preceding agencies')

3. Item numbers of items being reported owned-but-not-circulating (OBNC)
   (Reported here per agency, relaying own and also preceding agencies')

C. Relay immediately to hq. at Topeka

1. Item numbers of own items being mailed
2. Item numbers of own items being reported OBO (at this stage)
3. Item numbers of own items being reported OBNC (at this stage)

(Note: This information is for special statistical tabulation)

D. Hq. (TPL) tabulates immediately the relayed information (see C above) per agency

1. Marks master list at left margin with symbol of agency supplying the item (mailing)
2. Marks master list in right margin each agency's OBO and OBNC report
3. Tabulates statistics per agency as received (daily)

(Note: Hq. reports final OBO, OBNC, and NO to requesting agencies - different and separate from tabulation in #3 above - and keeps the customary statistics on final results after last agency on circuit has reported to hq.)

Addendum III

June 11, 1970

INSTRUCTIONS - EXPANDED NETWORK

Pilot Project: Week of June 15-19, 1970

I Conference-call list

- A. List will be complete
- B. All participating agencies will receive conference-call list
- C. Agencies may do list searching entire or partial (see previous instructions) as suits their own staffing schedules

II Progression on circuit

- A. System centers
    - 1. Order of relay
        - SEK/Iola
        - NCK/Manhattan
        - CK/Great Bend
    - 2. CK/Great Bend relays to JCPL
- B. KIC libraries (except Topeka)
    - 1. Order of relay
        - JCPL
        - Wichita
        - Hutchinson
        - Salina
        - Kansas City
    - 2. JCPL receives from CK/Great Bend
    - 3. Kansas City relays to State Library
- C. Special and universities
    - 1. Order of relay
        - State Library
        - KU
        - KSU
    - 2. State Library receives from Kansas City
    - 3. KSU relays to Topeka P.L.
- D. Last searcher is TPL (which is also headquarters)

III Time of relay

- A. Please continue to relay to headquarters (with other information requested) the time of day, and date, when you transmitted list information to the agency that follows you.
- B. Topeka: report the time list search is completed.

INSTRUCTIONS - EXPANDED NETWORK (continued)
June 15-19, 1970

IV Procedures

A. Search the list (according to either #1 or #2)

1. In toto, beginning of day
2. In part, when message received from previous agency

B. Relay to next library agency on circuit

1. Item numbers of items being mailed
(Reported here by cumulative listing of numbers, rather than per agency. Add own to others previously listed, keeping in numberical sequence.)
2. Item numbers of items being reported owned-but-out (OBO)
(Reported here per agency, relaying own and also preceding agencies')
3. Item numbers of items being reported owned-but-not-circulating (OBNC)
(Reported here per agency, relaying own and also preceding agencies')

C. Relay immediately to hq. at Topeka

1. Item numbers of own items being mailed
2. Item numbers of own items being reported OBO (at this stage)
3. Item numbers of own items being reported OBNC (at this stage)

(Note: This information is for special statistical tabulation)

D. Hq. (TPL) tabulates immediately the relayed information (see C above) per agency

1. Marks master list at left margin with symbol of agency supplying the item (mailing)
2. Marks master list in right margin each agency's OBO and OBNC report
3. Tabulates statistics per agency as received (daily)

(Note: Hq. reports final OBO, OBNC, and NO to requesting agencies - different and separate from tabulation in #3 above - and keeps the customary statistics on final results after last agency on circuit has reported to hq.)

AVAILABILITY STUDY

Data used in this study is for the week of February 16-20, 1970. Data for the week of May 18-22, 1970, has not been used, since the owned-but-out (OBO) and owned-but-not-circulating (OBNC) information is not accurate, according to Miss Pomeroy. Availability is shown for each day as well as a summary for the week.

The purpose of this study is to show the percentages of items available, or items which could have been mailed, in each of the fourteen agencies. The agencies are ranked or arranged on each table according to their rate of availability; the agency with the highest percentage of availability is first followed by the other agencies in decending order to the one with the lowest percentage of availability.

The percentage of availability for each agency was computed as follows: the items owned but not available (because they were reported either OBO and/or OBNC) were subtracted from the total items owned in order to obtain the items owned and available; this amount (items owned and available) was divided by the total items on the KIC lists, producing the percentages of availability.

As shown on the tables, the two university libraries, KSU and KU, almost consistently have the highest percentages of availability, while the State Library and the regional library systems (with the exception of SEK) have the lowest percentages of availability. It is pointed out that for the week (summary table), the Southeast Kansas Library System is rated third, only 3.26% behind KSU and 1.23% behind KU. These figures indicate that intrasystem searching is advantageous and should be investigated by other regional library systems.

INTRASYSTEM SEARCHING

The Intrasystem Searching Tables show the effect of possible intrasystem interlibrary loan networks. The data from both weeks, February 16-20, 1970, and May 18-22, 1970, were used.

For the purposes of this experiment, the following KIC libraries were used in relation to the regional systems in which they are located: Kansas City, Johnson County, and Topeka for the Northeast Kansas Library System; Hutchinson and Wichita for the South Central Kansas Library System; and Great Bend and Salina for the Central Kansas Library System. No additional agencies were used for the North Central Kansas Library System, Northwest Kansas Library System, Southeast Kansas Library System, and Southwest Kansas Library System.

The number of items requested by all libraries within each regional system was counted for each day. Ownership of each item was then checked to discover if any of the KIC members located within that system owned the book. Only ownership was noted; OBO and OBNC notations were disregarded, as the rules for KIC note that items owned by a library should not be placed on the Circuit, unless the request is of an urgent nature, whereby a patron's serious research may be hampered. Totals for each day and a summary for each week of the number of items requested on KIC within each regional system, the number of items owned within each regional system, and the percentages of items owned or which could have been filled had intrasystem searching been utilized, are shown. The percentages were computed by dividing the items owned within a system by the items requested within a system.

The results of this experiment indicate that intrasystem interlibrary loan searching is worthy of investigation. For example: had the CKL System searched the Salina collection, almost 38% of this system's requests for the two weeks studied would not have been placed on KIC; approximately 57% of the requests for the NEKL System would not have reached KIC had the Kansas City, Johnson County, and Topeka collections been searched first; if Wichita's requests had first been searched at Hutchinson, 23% of the requests from the SCKL System would not have been forwarded to KIC. An additional factor reflected in these percentages is that most systems and KIC libraries are placing owned items on the Circuit. The percentages for those systems in which no KIC libraries are located or which utilize intrasystem searching are comparatively lower, indicating that these agencies are following the "owned items rule" to a greater degree.

The combined totals for all systems for the two weeks reflect that KIC would receive 35% less requests if intrasystem interlibrary loan networks were operating in all systems and if all agencies would conform to the ownership rules.

The Interlibrary Loan Philosophy Statement adopted by the Interlibrary Loan Committee, states in part: "Each regional system of cooperating libraries will have, or develop, an interlibrary loan service for public libraries within its geographical boundaries. This may include the development of an intrasystem network with certain libraries (of all types) within the boundaries of the system. The objective should be for each system to fill 90% of the interlibrary loan requests from its public libraries..." Therefore, it is recommended that each system which is not now utilizing intrasystem interlibrary loan searching, conduct studies of ownership, availability, personnel etc., among the major resource libraries within the system. Such studies would indicate those agencies which could be included in an intrasystem interlibrary loan network.

SYSTEM INTERLIBRARY LOAN REPORTS

The following three reports were submitted to the Interlibrary Loan Committee as part of its investigations. The purpose of the reports is to show the subject areas of materials requested by the three systems, and the number of duplicate requests. The reports were submitted by:

Central Kansas Library System - Duane Johnson
North Central Kansas Library System - Marjorie Reed
Southeast Kansas Library System - Lucile Wagner

The fourth report, submitted by Marjorie Reed, is an analysis of the items not-owned (NO), owned-but-out (OBO), and owned-but-not-circulating (OBNC), from selected Kansas Information Circuit lists of 1969.

July 13, 1970

TO: Kansas State Library Interlibrary Loan Committee

SUBJECT: CKLS Interlibrary Loan Request Classification

The following study is an examination of the interlibrary loan book requests generated by the libraries of the Central Kansas Library System during the period, January through June 1970.

The study examines only those requests forwarded to the Kansas Information Circuit. An additional 745 book requests filled by the system headquarters are not included in the classifications. In addition, several day lists in January were misplaced, thus another 280 requests were unable to be classified. Loan volume breakdown for the time period studied is as follows:

2519	Total K.I.C. book requests from C.K.L.S.
- 280	Lost
2239	
- 441	Not identifiable as to fiction or nonfiction
1798	Total requests classified

Of most significant interest perhaps is that out of 2,239 requests, there were only 48 duplications, and out of 1,798 identifiable requests, only 181 were fiction.

Duane F. Johnson
